Safety and Precaution

- Do not disassemble the product or subject the product to impact.
 Doing so may damage the product.
 Unauthorized disassembly of the product voids the product warranty.
- Do not operate the product while driving a vehicle.
 Distraction while driving may cause accidents and result in injury or death.
- Do not expose the product to direct sunlight or intense light.
 The lens or internal circuitry may fail permanent physical damages may result if it is operated or stored out of the specified temperature ranges.
 Such damages are not covered by the warranty.
- Do not remove SD card or turn off the power cable during the firmware update.
 It may cause malfunction or loss of data.
- Use of genuine DEEPFLY memory card is recommended.
 Failure to use genuine SD card may cause error or malfunction.
- Real-time recording and playback via Wi-Fi could be delayed depending on the specifications of your smart device.
- Motion detection is initiated by an image sensor software.
 Errors may occur depending on the surrounding environment and the voltage of the car.
- If the GPS signal is good, ADAS will activate when the speed of the car is above the set speed. The surrounding environment may cause errors.
- Do not modify or cut the power cable. Also, do not place heavy objects on the power cable or pull, insert, or bend the power cable not using excessive force. Doing so may result in electrical fire or electrocution.
- Unauthorized connection of the power cable may cause malfunctions.
 Connections must be different depending on the power type of the vehicle.
 (Please contact a professional engineer if you need help to install it)
